- Implement emergency action plans and conduct scale drills
- Gain high confidence in providing first aid

Certification & Benefits

- Certification of completion
- Hands-on practice with professional instructors
- Course notes & training materials
- Practical simulation & drills
- Meals & refreshments

CENTRIC GROWTH

Basic Life Support (BLS) & First Aid Training Program

Trainer Profile

DR. MAHENDRA

Emergency Medicine Specialist in Training | Certified ACLS & BLS Trainer

Dr. Mahendra is a dedicated emergency medicine professional with extensive expertise in resuscitation and trauma care. Currently serving as a Registrar at the A&E Department of Hospital Tengku Ampuan Rahimah, he holds multiple international qualifications, including MRCEM and FRCEM from the Royal College of Emergency Medicine.

As a certified ACLS & BLS trainer and HRDF-accredited trainer (2025), Dr. Mahendra specializes in delivering hands-on, high-impact emergency response training for healthcare professionals and the public. His expertise includes simulation-based education, advanced life support techniques, and structured emergency preparedness programs.

With a passion for lifesaving education, he actively conducts training workshops, CPR awareness campaigns, and research in bystander CPR effectiveness. His engaging, real-world training approach empowers participants with the skills and confidence to respond effectively in critical situations.

Methodology

1	Presentations
2	Group Discussions
